Subject: [SPAM] RE: Beaumont Groundwater Pump Station

Hi Mike,

I'm being told that yesterday a representative of the local health department in Port Arthur stopped by our medical shelter located at the Jefferson Middle School. She recommended they go back to bottled water and MREs due to concerns over E. Coli and oil in the PWS. I'm told the oil concern was related to a spill at Colonial Pipeline. However, no one at the camp detected evidence of oil in the drinking water. From the available information I don't see evidence of a concern here.

Troy

Hi Mike,

Not sure if this is on your radar, but we received these pictures (link below) from our field folks regarding the groundwater raw water pump in Beaumont. Was this intake impacted by oil/grease? Please advise, we've been asked to assist with getting the plant operational again.

Thanks,
Cory

Hi Cory/John,

Here are some photos of a groundwater pump station in Beaumont. Not sure if this would become a temp CPF issue but may be relevant as John and I get more intel on the ground here in Beaumont.
